

ESI Environmental

ISO 14001 Certified

ESI Environmental is an ISO 14001 Certified industrial wastewater treatment and environmental management company headquartered in Indianapolis, Indiana. ESI's facility, serviced by rail and truck, is one of the largest and most modern non-hazardous wastewater pretreatment facilities in North America. This facility can handle more than 1.5 million gallons of wastewater per day. While our primary focus is on the treatment of non-hazardous waste streams, we can also provide on-site technical assistance and operational support in the field.

PROFESSIONAL SERVICES

From industrial cleaning and waste management to ISO 14001 Certification consulting, ESI offers more than wastewater treatment.

Industrial Cleaning

Our experienced staff will work with you to determine the solution that best fits your needs. ESI has a reputation for providing cost-effective options and excellent results. Tank cleaning, UST removal, plant shutdown, facility maintenance cleaning, and machine flushing and decontamination are a few of the services ESI can perform. ESI has extensive capabilities with the use of a 10,000-psi hydroblaster, 4,000-psi pressure washers, and a fleet of equipment, including vacuum trucks, roll-off containers, and tankers.

Hazardous and Non-Hazardous Waste Management

ESI will provide the expertise to manage your facility's waste. From setting up your waste storage areas to training your employees on compliance issues, our staff will ensure that your facility practices meet federal, state, and local regulations. Through cooperation of our transportation and disposal partners, ESI will manage every aspect of waste management from delivery of empty drums, to waste disposal, to year-end reporting.

- Non-hazardous compounds and chemicals
- Flammables
- Fuel blending
- Process solids/liquids/sludge
- Catalyst/reagents
- Polychlorinated biphenyls
- Corrosives
- Cylinders
- Universal wastes – lamps, batteries, ballasts

Lab Packing

Classification, packing, and disposal of unused or expired chemicals. Our professional staff will handle all aspects of your lab pack, including inventorying the items to be packed, packing the chemicals according to regulations, and transporting to the disposal facility.
